

Pediatric Care Unit at Monroe Community Hospital

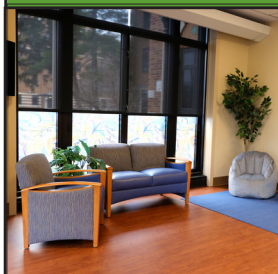

Our newly renovated Pediatric Care Unit is a five-bed, state-of-the-art skilled nursing unit. It features a fully accessible home-like setting providing for a child's medical, physical, social, and psychological needs. We are the only long-term care program in the region specializing in pediatric care for children with a variety of complex medical conditions. Our unit is staffed with specially trained medical and nursing professionals from the University of Rochester Medical Center, and offers the highest quality short-term rehabilitation, long-term care or respite care for children under the age of 21.

Our Medical Team

Dr. Ariadne Lie is the Assistant Professor of Clinical Pediatrics and Clinical Medicine at the University of Rochester. She is certified by the American Board of Internal Medicine and the American Board of Pediatrics. She completed her Pre-Med education at Harvard University and medical school at Wayne State University School of Medicine. She currently practices medicine at the URM Complex Care Center caring for both adults and children and is now the attending physician at Monroe Community Hospital's Pediatric Care Unit.

Dr. Amy Jerum is the Director of Workforce Development for the University of Rochester Department of Pediatrics Complex Care Center. She is also an Assistant Professor of Clinical Nursing at the University of Rochester School of Nursing. She holds a Doctorate in Nursing as well as Master and Bachelor of Science degrees. She is a board-certified Pediatric Nurse Practitioner and Pediatric Mental Health Specialist.

A Letter from the Staff at Mary Cariola

"Mary Cariola was fortunate to partner with Monroe Community Hospital in service with one of our children. This young boy had suffered a broken bone as a result of a fall while vacationing with family. Our teams interfaced to coordinate his admission from in-patient hospitalization to arrange for rehab. The team at Mary Cariola include Occupational and Physical Therapists, Behaviour Therapists, school principals and teachers. The coordination of MCH's team of physicians, nurses and clinicians was exceptional. The success of the admission to MCH was evident in the child's successful outcome. The teams worked to coordinate attendance in school while he was in rehab. He is now back at being fully functional and back to his fun-loving self."
