Ventilator Unit

A Community of Caring

Monroe Community Hospital is one of the largest and most comprehensive skilled nursing facilities in New York State, providing quality care to more than 566 individuals with complex or chronic health conditions. As the first healthcare facility in Monroe County, we take pride in the fact that we have been providing expert care to members of our community for more than 190 years. MCH is situated on a 22-acre, park-like campus bordering the historic Erie Canal in Rochester, New York and our building is one of the region's most beautifully designed landmarks.

Ventilator Unit

Open in November 2018, Monroe Community Hospital's Ventilator Unit offers 20 beds, with the ability to provide all-day ventilator care. With state-of-the-art ventilators, monitors and therapy equipment, it is possible for residents to adjust to life with a ventilator while receiving exceptional care and working towards greater independence.

Respiratory Care Staff

The unit staff consists of a Medical Attending MD, Pulmonologist MD, nurse practitioners, nurses, respiratory therapists, with access to highly trained physical, occupational and speech therapists.

Every staff member provides quality care that is individualized for each resident, and works to improve functional independence and quality of life. As each resident has specific needs from respiratory therapy to

physical therapy to in-room music therapy, MCH is committed to providing exceptional and specialized daily care.

World Class Care

As an innovative Long-Term Care and Rehabilitation Facility, MCH is one of the most respected skilled nursing facilities in the country. Since 1967, MCH has had an affiliation with the University of Rochester Medical Center to provide expert medical services. In collaboration with the University of Rochester, MCH is able to build on our record of success as we provide around-the-clock care for those who utilize ventilators.
