# Geriatric, Pediatric and Palliative Care

## A Community of Caring

Monroe Community Hospital is one of the largest and most comprehensive skilled nursing facilities in New York State, providing quality care to more than 566 individuals with complex or chronic health conditions. As the first healthcare facility in Monroe County, we take pride in the fact that we have been providing expert care to members of our community for more than 190 years. MCH is situated on a 22-acre, park-like campus bordering the historic Erie Canal in Rochester, New York and our building is one of the region's most beautifully designed landmarks.

### Geriatric Care

As an innovative Long-Term Care and Rehabilitation Facility, Monroe Community Hospital is one of the most respected skilled nursing facilities in the country. Since 1967, MCH has been affiliated with the University of Rochester Medical Center to provide expert medical services. MCH's Medical Director also serves as Chief, Division of Geriatrics & Aging for URMC. This partnership allows MCH to provide compassionate, state-of-the-art, comprehensive care to older adults who call the facility home.

### Pediatric Care

Opened in November 2018, MCH's Pediatric Care Unit is a five-bed, state of the art unit that allows our highly trained staff to provide specialized daily care for pediatric residents. Located in the brand new ventilator unit, the Pediatric Care unit is equipped to care for pediatric-specific vents residents. Additionally, this is a

secure unit, maximizing the safety and security for any infants, children or adolescents who call the unit home. The unit also provides direct access to an ADA compliant and handicap accessible playground.

### Palliative Care

MCH is able to provide various levels of Palliative Care for residents who are living with a serious illness. In conjunction with our traditional skilled nursing care, we offer residents and families in need of hospice and palliative care, the option to participate in hospice services. Residents are cared for day-to-day by our nursing staff with additional hospice services provided by one of our contracted providers.
