

Monroe Community Hospital

A Community of Caring

Monroe Community Hospital is one of the largest and most comprehensive skilled nursing facilities in New York State, providing quality long-term care and rehabilitative services to more than 566 individuals with complex or chronic health conditions. We are home to residents of all ages, from infants as young as eight weeks to adults more than one hundred years old. As the first healthcare facility in Monroe County, we take pride in the fact that we have been providing expert care to members of our community for more than 185 years. MCH is situated on a 22-acre, park-like campus bordering the historic Erie Canal in Rochester, New York and our structure is one of the region's most beautifully designed landmarks.
