A Community of Caring

Monroe Community Hospital is one of the largest and most comprehensive skilled nursing facilities in New York State, providing quality care to more than 566 individuals with complex or chronic health conditions. As the first healthcare facility in Monroe County, we take pride in the fact that we have been providing expert care to members of our community for more than 190 years. MCH is situated on a 22-acre, park-like campus bordering the historic Erie Canal in Rochester, New York and our building is one of the region's most beautifully designed landmarks.

Caring for All Ages

Monroe Community Hospital is a fully certified residential health care facility, providing skilled nursing care for individuals with complex health conditions requiring higher levels of medical and nursing care. We are proudly owned and operated by Monroe County.

Compassionate Caring

MCH cares for residents with chronic and complex medical needs that cannot be properly cared for in a traditional nursing home setting. Our dedicated employees approach their jobs with tremendous concern for the individuals living at MCH. Family members frequently comment about the friendliness and compassion of our staff who work together around-the-clock providing a caring and supportive atmosphere.

World Class Care

As an innovative Long-Term Care and Rehabilitation Facility, MCH is one of the most respected skilled nursing facilities in the country. Since 1967, MCH has had an affiliation with the University of Rochester Medical Center to provide expert medical services. Some of the nation's most prominent medical professionals have gone on from MCH to become world class leaders, including a former U.S. Surgeon General as well as directors of the National Institute on Aging and the World Health Organization.
